Image report

The `img` elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition.

Images with textual alternative

The following images have textual alternatives. Please review that the textual alternatives make sense considering the purpose of the image in the context of the page and that phrases like “Image of ...” are avoided.

Note that iconic images that are redundant with text next to them or purely decorative should have `alt=""` instead.
